CCHOA UPDATES - Flagpole, sign, & BOD

Dear CCHOA members:

The board wants to keep all of the membership up to date on anything going on in our community. Currently, there is the improvements planned for our Blue Angel entrance.

FDOT has contracted to put a turn lane going from the South to the North in order for traffic to make the right hand turn from Blue Angel onto Grand Bahama Dr.

Thus, CCHOA is being required to remove our sign located at the SE corner (across from the Flagpole). The electrical service for the sign as well as the Flagpole will be secured by FPL on 1 Feb, prior to the construction that's supposed to be started in the next 30 days or so...

The Blue Angel Flag will be lowered and secured until such a time we can get power restored. (after construction)

No decisions have been made to date of the relocation of the Coral Creek Sign. the CCBOD has requested from Henry Company that we be granted a new sign easement in order to relocate the sign from where it is currently to somewhere closer the entrance of Coral Creek, but nothing more is known at this time.

The irrigation system will be out of operation until after the construction, since there will be no power to the well, which may or may not need to be abandoned, no firm decisions have been made to address that aspect at this time.

News from the board: There are currently 2 open positions. If you're interested in becoming a member of the Coral Creek Board of Directors, please reach out to the current President (Acting), via the CCHOA email address:
